## PROFESSIONAL SUMMARY

---

A Computer Science graduate proficient in software development methodologies with expertise in the Django framework and a strong foundation in data structure concepts. Also skilled when it comes to writing robust code, developing algorithms, and implementing user-centric design approaches to enhance user experience. With my high-level attention to detail and in-depth understanding of emerging technologies and industry best practices I drive progress in the tech industry creating bespoke software applications to fit the needs of target users. I am also very knowledgeable about collaborating in teams, learning new technologies quickly, and adapting to different project requirements.

---

## WORK HISTORY

---

**Software developer**, 06/2025 - Current

**Delego AI** - Abeokuta, Ogun State

- Engineered a context-aware automation system that intelligently understands work patterns and autonomously assigns tasks with near-human precision.
- Built an AI-driven delegation platform combining Django, React, and custom models to deliver smart workflow orchestration at enterprise scale.
- Implemented a dynamic notification and monitoring pipeline that delivers instant updates, ensuring continuous workflow visibility and frictionless team coordination.
- Developed a task intelligence layer capable of interpreting organizational context, workload balance, and employee strengths to automate management-level decisions.
- Designed a self-optimizing productivity engine that boosts team efficiency through adaptive task routing, behavioural insights, and real-time decision intelligence.

**Intern Django developer**, 05/2024 - 10/2024

**Smartcode Academy** - Abeokuta, Ogun State

- Assisted and learnt the proper integration of Artificial Intelligence into Web systems.
- I helped the team implement sustainable backend pipelines.

**Software developer**, 05/2024 - 10/2025

**Alabata Market** - Abeokuta, Ogun State

- Improved website usability by implementing strategic changes to the site's layout.
- I created bespoke features to fit the needs of the University students.
- I integrated active geographical API to actively monitor the locations of sellers to validate sellers integrity.
- Also added the profile feature for each seller which has functionalities like Number of clicks, Verified Purchases and Seller Points.
- Maximized the ease of user for the buyers by redirecting them to the sellers Whatsapp DM to Complete purchase and Chat with the seller.
- Utilised Python for back-end development, resulting in robust server-side solutions.
- Developed database-driven applications with MySQL to manage large volumes of information efficiently.

**Software developer**, 11/2024 - 05/2025

**Edupal Institute** - Abeokuta, Ogun State

- Collaborated with cross-functional teams to deliver high-quality software products.
- Implemented innovative solutions for complex challenges, boosting process efficiency.
- I integrated cutting edge APIs to deliver a sound and robust software system .
- Provided support during all phases of the development lifecycle, leading to higher client satisfaction rates.
- Adapted quickly to new frameworks and APIs as per project requirements.

---

## SKILLS

---

- Data structure concepts
- Multithreading and multiprocessing
- Software development methodologies
- Algorithm development
- AI Automation
- Python development
- User-Centric design approach
- Context-aware AI Integration
- Django framework
- Javascript (React)
- Django framework expertise
- Front-End development tools
- Machine learning basics
- Deep learning techniques
- Familiarity with ORM libraries
- Supervised and unsupervised learnings

---

## EDUCATION

---

**Certificate of Primary Education**, 09/2006 - 07/2014  
**Tofunmi Children School** - Nigeria

**Junior School Certificate**, 09/2014 - 07/2017  
**Yewa College** - Ilaro

**Senior School Certificate(WAEC)**, 09/2017 - 12/2020  
**Optimum Success College** - Iaro

**Bachelor of Science: Computer Science**, 11/2021 - 07/2025  
**Federal University of Agriculture** - Abeokuta  
• Graduate with B.Sc Computer Science (2nd Class Upper CGPA: 4.26)

---

## PROFESSIONAL AFFILIATIONS

---

- Nigerian Association of Computing Students (NACOS)
- Google Developer Students Club (GDSC FUNAAB)
- Microsoft Community (MSFT FUNAAB)
- Computer Professionals of Nigeria (CPN)

---

## CERTIFICATIONS

---

**Graduate Member Computer Professionals of Nigeria**, 07/2025 - Current  
**Computer Professionals** - Nigeria

---

## LANGUAGES

---

**English**

**Yoruba**

Fluent

Native

---

## HOBBIES AND INTEREST

---

- Reading
- Guitar Playing
- Documentaries and Movies

---

## CAREER OBJECTIVES

---

I'm focused on using technology, especially AI, to solve real-world problems in ways that are actually useful to people and businesses. I enjoy designing systems that are both intelligent and practical, and I'm always looking to improve how things work behind the scenes. As I continue to grow, I'm working toward getting into mobile development so I can build smart, accessible tools that work seamlessly across devices and make a real impact.
